## Art Out: Pictures From Another Time: Photographs by Bob Colacello, 1976-1982

May 3, 2019

New York - Beginning May 3, 2019, Vito Schnabel Projects will present *Pictures From Another Time: Photographs by Bob Colacello, 1976 - 82*, an exhibition of photographs taken by Bob Colacello during the years he served as editor of Andy Warhol's Interview magazine. *Pictures From Another Time* features approximately 150 vintage and unique prints—most never previously exhibited—made with Colacello's Minox 35 EL camera, the first miniature camera capable of making full frame 35 millimeter photographs. Works on view reflect the societal fluidity and social mobility of "the Me Decade," an era of emerging liberation movements in American culture. As both a favored confidant and detached observer of some of the most significant figures of that time, from politicians, tycoons, and fellow journalists, to artists, writers, fashion designers, and movie stars, Colacello was uniquely positioned to create an enduring portrait of the Seventies.
